

Staff Certification Training Review Attestation Form

Many certifying agencies are not holding recertification courses for CPR, first aid, lifeguarding and other aquatic courses because of the COVID-19 public health emergency. As a result, a statewide variance has been issued extending the acceptance of required certifications beyond the State Sanitary Code specified durations, for individuals working or volunteering at regulated swimming pools, bathing beaches, recreational aquatic spray grounds, and children’s camps. This variance applies to certifications that expire(d) between January 1, 2020 and September 22, 2020.

The variance is issued with the condition that each individual attest in writing that they have reviewed the course training materials for the certification(s). This attestation must be completed regardless of any extension that may have been granted by the provider; however, a review of the training curriculum directed by the provider will satisfy the training review if it covers the course materials. Facility operators must maintain the attestation forms onsite for review by the health department.

Provider (Certifying Agency)	Certification Title	Training Review Date(s)

I, _____ (Print Name), attest that I have completed a comprehensive review of the certification training materials for the courses specified above on the indicated dates.
